ABSTRACT

The 35 tests in this bibliography assess individual's knowledge regarding geography. Many of the tests are social science tests which are included because one their subtests measures geographical knowledge. Tests which assess study skills, such as map or graph reading, are not included in this bibliography. Although all age groups are represented, grades 7 through 10 are particularly heavily represented. Each test citation may include the following data elements: AN (a six-digit identification number assigned by the Test Collection); TI (name of the instrument); DT (components within the overall test that assess particular skills or factors); AU (personal or institutional author); YR (year in which the test was published or copyrighted); AV (test publisher or distributor); GL (list of grades for which the test is suitable); TG (list of ages for which the test is suitable); and AB (a description of the test and its purpose). INTRODUCTION

Scope of Bibliography

Most of the tests described in this bibliography are for use in grades 7 and above. Tests which assess study skills, such as map or graph reading are included in a Study Skills bibliography.

Availability

Copies of the tests described on the following pages must be obtained directly from the publisher, as stated in the AV AVAILABILITY section of each test citation. Generally, the Test Collection does not have distribution rights for its holdings. However, in special instances, the Test Collection has been granted permission from individual authors to distribute their tests, which are primarily research instruments. The AV AVAILABILITY information for these instruments will be Tests in microfiche, Test Collection, Educational Testing Service, Princeton, NJ 08541.

Guide to Citation Elements

The following is a guide to the various elements which may be present in a test citation:

AN - Six-digit identification number assigned by the Test Collection

TI - Name of the instrument

DT - Components within the overall test which assess particular skills or factors

AU - Personal or institutional author

YR - Year test was published or copyrighted

AV - Test publisher or distributor; the organization which sells or distributes the instrument

AB ABSTRACT: The DANTES program is a series of secure tests administered by postsecondary institutions to grant credit by examination for education gained outside the classroom. Examinations may be worth from two to six credit hours in a baccalaureate program, baccalaureate upper division program, or a technical program. A minimum score for credit has been established by the American Council on Education. Individual institutions administer the examinations, as well as set the fees and schedules. These instruments complement the College Board's College Level Examination Program (CLEP) with several instruments in applied technology. They were originally developed for military personnel. Major areas of assessment include mathematics, social science, physical science, business, foreign language, and applied technology. For each test a fact sheet containing the curriculum specifications of the course, a list of texts on which the test is based, and statistical information, is available. Qualified administrators and faculty may borrow sample tests for a period of thirty days. Contains 90 multiple-choice items and covers physical geography, culture and environment, spatial processes, regional geography.

TG TARGET AUDIENCE: Adults, Older Adults.
AB ABSTRACT: This test battery is used to determine an individual's eligibility to receive a high school equivalency certificate. It is designed for use by anyone who has not completed a four-year high school education program. There are five subtests. The Writing Skills subtest includes an essay section and items concerning sentence structure, usage, mechanics. Social Studies content includes history, economics, political science, geography and behavioral sciences (anthropology, psychology, sociology). Science covers life sciences and physical sciences. The language section covers popular literature, classical literature and a commentary section on film, art, theater, etc. Mathematics covers arithmetic, algebra, geometry. Information about computer literacy has been integrated into the context of questions in several of the subtest areas. The test items measure skills relevant to adult experiences. Items require understanding of broad concepts and generalizations and measure the general ability to evaluate, synthesize, and draw conclusions. The GED battery is available in French, Spanish,

Braille, large print, and on audio cassettes. There tests were originally developed by the Examination Staff of the United States Armed Forces Institute (a committee of civilian educators) as a method of evaluating military personnel who lacked a high school diploma. After the Second World War, the use of the test battery was extended to civilians also. Generally, changes in the examination consist of requiring examinees to use high level thinking skills and problem solving skills rather than merely supplying factual answers. The teacher's manual for the test can be purchased from Contemporary Books, 180 N. Michigan Ave., Chicago, IL 60601.

AB ABSTRACT: A catalog of several hundred objectives in the subject areas of science, social studies and life skills. By selecting the objectives most important to their respective schools, educators can design criterion-referenced test booklets from an item bank of several thousand items. Part of the MULTISCORE customized criterion-referenced test development service, which measures student proficiency in six basic skill areas. The tests may be used as minimum competency examinations, as exit tests for assessing specific end-of-year proficiencies, and as pretests or posttests for federal programs and other special projects. The system is multidimensional and multidirectional.

AB ABSTRACT: A testing procedure using responses in a list of up to one thousand alphabetized potential answers. Each response has a three-digit code that the student marks on a machine-scored answer sheet. It is suggested that thought processes similar to those required by cloze procedure (fill-in) are used, while the advantage of machine scoring is retained. As of this writing, sample items are available in United States history and geography. An IBM-compatible program for microcomputer is available for list generation.

AB ABSTRACT: A measure of achievement in basic skill areas covering a broad range of objectives. The Vocabulary subtest covers meaning of words in context. The Reading Comprehension subtest covers recognizing detail and sequence, inferring meaning; cause and effect, main idea, character analysis, drawing conclusions, determining author's purpose, distinguishing fact from opinion. The Mathematics subtest covers numeration, geometry, measurement, decimals, fractions, advanced concepts, functions and equations, customary and metric measurement, problem solving, graphs and statistics, computation with whole numbers requiring addition and subtraction, multiplication, division and estimation, addition, subtraction, multiplication and division with decimals, fractions and mixed numbers; percents and proportions. Spelling requires that the correct spelling be selected. The Language subtest covers rules for standard English including punctuation, capitalization, usage, written expression, study skills as dictionary skills, and use of reference sources. The Science subtest covers physical, earth, space, and life sciences. The Social Studies subtest covers geography, economics, history, political science, and human behavior. Science and Social Studies subtests assess knowledge, comprehension,

inquiry skills and critical analysis from Bloom's Taxonomy. This test has empirical fall and spring nnorms and interpolated week of testing norms. Scores are: scale; national, nonpublic, and local percentile ranks; stanines; normal curve equivalents; grade equivalents. Scores in higher order thinking skills and research skills can be derived from items embedded in content areas. Reading and Math tests provide an instructional level for pupil placement in texts and programs.
